ABOUT ME

I'm Seunghyun, a full-stack developer driven by a growth mindset and a passion for problem-solving.

I hold a Bachelor of Science in Computer Science and Information Systems, with a focus on database studies. I previously worked as a sales support and pricing analyst for 18 months. Recently, I completed a 17-week web development bootcamp at Dev Academy, gaining practical experience in full-stack development.

Moving into the tech industry has long been my ultimate goal, and combining the knowledge from my university studies with the hands-on learning at Dev Academy has strengthened my commitment to this path. With strong communication and human skills, I'm eager to take on new challenges in this field and to develop creative, collaborative solutions to complex problems.

EXPERIENCE

Dev Academy, Newmarket — Student

MARCH 2025 - JULY 2025

- Completed a 17-week web development bootcamp, working on various projects both independently and collaboratively. This hands-on program offered daily practice with modern web technologies, including HTML, CSS, JavaScript, Git/Github, Node JS, AUTH0, SQLite, TypeScript, Tailwind CSS, React, React Query, Rest API, Superagent, and Express.
- Collaborated in pairs and team projects following Agile methodologies, which deliver projects effectively. Beyond technical training, the bootcamp focused on developing human skills such as active listening, constructive feedback, nonviolent communication, empathy, emotional intelligence, self-awareness, adaptability and self-reflection.

SKILLS

Technical skills:

HTML, CSS, JavaScript, Git, Github, Node JS, AUTH0, SQLite, MySQL, TypeScript, Tailwind CSS, React, React Query, Rest API, Superagent, Express, Python
